

# 803D

**B&W**  
Bowers & Wilkins

A new model for the 800 Series, the 803D brings diamond dome technology to a less technical looking piece of furniture than the larger 'headed' models.

Here the FST™ midrange driver is housed in its own isolated section of the beautifully curved, Matrix™-braced main cabinet, which is kept as narrow as possible in order to optimize the dispersion of sound.

In order to have a similar bass output capability to the wider 802D, the 803D uses three 7" Rohacell® cone bass drivers, this time supplemented by a front-firing Flowport™. Like all of our dedicated bass-only drivers, the basic rigidity of the radiating area is enhanced by our novel 'mushroom' construction, a girder-like component that supports the central area of the dustcap.

Although we talk about the three different drive unit types, it is the way these speakers behave as a single whole entity that impresses. It doesn't matter if the programme is music or film, the naturalness and realism portrayed by these speakers is uncanny.

<i>Description:</i>	3-way vented-box system	<i>Nominal Impedance:</i>	8Ω (minimum 3.0Ω)
<i>Frequency Range:</i>	-6dB at 28Hz and 33kHz	<i>Dimensions:</i>	H 1164mm W 306mm D 457mm H 45.8" W 12" D 18" (not including feet)
<i>Frequency Response:</i>	35Hz – 28kHz ±3dB on reference axis	<i>Weight:</i>	45 kg / 98 lbs.
<i>Sensitivity:</i>	90dB spl (2.83V, 1m)	<i>Finishes:</i>	Cherrywood, Rosenut, Black Ash
